DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Examiners' Comments

2. As per applicants transmittal sheet, it is noted that claims 1-8 have been canceled.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9-13 and 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leong in view of Wolf et al., as previously applied in the office action mailed 10/11/00.
5. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Leong in view of Wolf et al. as applied to claim 9 above, and further in view of Wolf, as previously applied in the office action mailed 10/11/00.

Response to Arguments

6. Applicant's arguments filed 1/11/01 have been fully considered but they are not persuasive.

Art Unit: 2823

7. Applicant contends that one of ordinary skill in the art would not have been motivated by the teaching of Wolf et al. to have modified Leong as asserted in the Office Action mailed on 10/11/00 because Wolf et al. teaches an anti-reflective coating that improves performance of resists. Applicants assert that Wolf et al. provides no suggestion that the anti-reflective coating could function as the claimed intrusion prevention film.

8. The examiner respectfully submits that the anti-reflective coating suggested by Wolf is, in fact, made of the same material that is claimed to comprise applicants claimed "intrusion prevention film". In response to applicant's argument that Wolf et al. is directed to an entirely different aspect from the claimed invention, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
